

350MW of solar power generation

The Market Management System registration represents a critical milestone for utility-scale solar projects entering Australia's National Electricity Market (NEM). Both facilities are ...

Lucy Solar joins several other major utility-scale solar developments underway in West Texas, including the Greyhound A Solar Project. Together, these projects underscore the region's ...

Construction has officially begun on the Lucy Solar Project, a 350-MW utility-scale solar farm in Concho County, Texas, following a groundbreaking ceremony held this week in Dallas after ...

This pair of 350MW CSP projects marks the beginning of the third generation of CSP technology in China. Each features three towers, with three solar fields and a central power block.

Hyundai E& C is expanding its presence as a global energy transition leader with the start of construction on its 350 MW solar project in Concho County, Texas.

Luminous Power Technologies has been awarded contracts for 350 MW of solar capacity under the PM-KUSUM scheme in Rajasthan, expected to generate up to 560 million units of ...

Cosin Solar breaks ground on a 350MW tower-type CSP project in Qinghai, the world's largest single-unit facility, set to generate 960 million kWh annually.

US renewable power developer Origis Energy has secured a financing package from Japanese bank MUFG to support the development of a 350MW solar portfolio in the US. The ...

Hengxin Technology's unit Qinghai Zhongkong will build a 350MW solar thermal plant in Delingha after obtaining key grid and land approvals. The advanced tower-based project targets ...

The Cosin Solar Golmud 350MW Tower CSP Project is the world's largest single-unit concentrated solar power plant. It adopts a "Three Towers, One Turbine" design and is equipped with a 14-hour molten ...
