How much does a 5kw wind system cost?

Installing a 5kW wind system such as Britwind R9000 will cost around £25,000 and generate 10,000kWh, or half of your annual usage. With an install cost of £25,000, it would reduce your energy bills by £8,000 per year, and break even in just over 3 years. There are some assumptions we've based these figures on.

How much does a residential wind power system cost?

Residential wind power installations are somewhat expensive. However, current federal, state and local energy incentives can significantly reduce those costs by 50-60%. A typical residential system costs from \$3,000 to \$6,000 for every kilowatt of generating capacity.
