

BESS price of solar panels for Australian factories

How much does a solar system cost in Australia?

As of September 2025, the average cost of a residential solar system in Australia is around \$0.88-\$0.95 per watt installed after the federal STC rebate. This means a 6kW system typically costs \$4,000-\$6,000, while a 10kW system costs \$7,500-\$10,500. Prices vary by city, with Darwin at the higher end and Perth at the lower end.

How much has Australia embraced solar?

It's hard to overstate just how much Australia has embraced solar. We have one of the highest rates of household solar adoption in the world, with over 3.69 million rooftop PV systems installed as of early 2024.

How much does a residential solar system cost?

The average cost per watt for a fully installed residential system has fallen from well over \$2.00/W in 2015 to approximately \$1.00/W in 2025. Note: Prices are indicative of average, post-rebate costs for standard residential installations of quality systems. Actual costs vary by location, system size, and component choice.
