

China Solar Power Buyback Program

The 13% tax rebate on exported solar panels -- a cornerstone of China's low-cost dominance -- has been discontinued.

China's National Development and Reform Commission (NDRC), in conjunction with the nation's energy administration, is taking steps to roll back subsidies for renewable energy projects, ...

China's top economic planning agency said on Sunday it was taking steps to scale back subsidies for renewable energy projects after a boom in solar and wind power installations.

Reduced solar subsidies could add pressure on China's solar industry, where overcapacity relative to global demand has led to a drop in module prices.

Although the changes are now being implemented in phases, the transition is still underway. Insiders report that the nine percent incentive will be withdrawn in two separate 4.5 ...

China plans to reduce renewable energy subsidies after a significant surge in solar and wind power installations led to achieving its 2030 target six years early.

China's solar sector faces turbulence due to the planned removal of a key export-tax rebate, which could disrupt demand patterns.

China's top economic planning agency says it is taking steps to scale back subsidies for renewable energy projects after a boom in solar and wind power installations. China broke its own ...

In a significant policy shift, China's National Development and Reform Commission (NDRC) announced it will scale back subsidies for renewable energy projects after years of rapid ...
