

# Cost of using 10kW collapsible containers in Middle Eastern ports

How effective are container ports in the Middle East?

In the Middle East, heavy investments in container port infrastructure and technology are proving to be effective. The new report also highlights the resilience of East Asian ports and the capacity of Chinese ports in particular to effectively handle challenges brought about by the pandemic.

How efficient are East Asian container ports?

The technical efficiency of East Asian container ports will be compared against that of South Asia and Middle East for a specific set of variables. This comparison would reveal the set of areas for specific ports which needs to be improved, as how other ports in this study have worked on that and have augmented their efficiency.

Which container ports are the most efficient?

In comparison, looking at the efficiency results of the South Asian and Middle Eastern container ports, only two ports are efficient. The efficiency of the Jebel Ali is for the reason that it is one of the prominent ports of the region and serves as a main hub for the UAE's shipping business.

What is the percentage of efficient ports in East Asia?

As compared to East Asian ports, the percentage of the efficient ports in South and Middle East is 13.33% as only two ports out of 15 are efficient, which is much lower. While the percentage of inefficient ports is higher with a value of 86.67% with 13 container ports being inefficient.
