

DJI T60 carries photovoltaic panels

This MPPT adapter module connects up to three solar panels via XT60 interface to DJI Power series, optimizing solar energy input for efficient recharging while preventing damage from incompatible panels.

This module allows you to connect up to three solar panels via the XT60 interface, offering an eco-friendly recharging solution for your DJI Power-series stations.

I don't currently have any DJI drone, but the mini 4K appeals to me because I'm retired and on a limited budget. I'm also no fan of cell phones and don't relish downloading and struggling ...

Hello guys, I saw many posts related to REMOTE_ID how it is working on DH MAVIC 3. So there is a way to disable it, actually not to enable it in first...

It is equipped with standard quick release bracket and controllable gimbal, which can be linked with the camera. It supports DJI pilot, brightness adjustment.
