

Why is Poland undergoing a dramatic shift in its electricity market?

Poland is undergoing a dramatic shift in its electricity market. Once a coal-reliant outlier in Europe's green energy movement, the country is now charging toward a more sustainable and diversified energy system.

Why are energy prices so high in Poland?

In Poland, where prices peaked at EUR270/MWh in August 2022, energy costs suddenly dominated public discourse and became a significant driver of inflation, undermining the country's economic competitiveness. This crisis has fundamentally reshuffled global energy policy priorities.

Why is Poland's energy sector undergoing a significant transformation?

Poland's energy sector is undergoing a significant transformation, with significant progress made in recent years despite ongoing challenges. The energy crisis, rampant energy and gas prices, and the rising cost of carbon dioxide (CO₂) emissions have translated into an increase in inflation not seen in decades.

What is the growth rate of electricity consumption in Poland compared to 2023?

In the same period, gross domestic electricity consumption amounted to 168,956 GWh and increased by 0.9% as compared to 2023. The growth rate of domestic electricity consumption was 2% lower than the GDP growth rate in 2024, which according to preliminary estimates of Statistics Poland increased by 2.9%.
