

How has Bulgaria restructured its energy industry?

The cornerstone of Bulgaria's transformation lies in the 2025 amendments to the Electricity Trading Rules (ET Rules), which dismantled the National Electricity Company's monopoly and restructured balancing groups to integrate renewable energy producers more effectively.

What is the electricity balancing market in Bulgaria?

The electricity balancing market for renewables in Bulgaria was initiated by the Transmission System Operator (TSO) on 1 June 2014, based on the Electricity Trading Rules adopted by the Energy and Water Regulatory Commission (SERC) in 2013. The market is structured around regulated access of third parties to the grid, with two distinct markets: the regulated market and the free market.

How has the Bulgarian electricity market changed since 1 July 2007?

Since 1 July 2007, the Bulgarian electricity market has been fully liberalised. The restructuring of electricity companies in accordance with the Second Energy Package has been completed, and Bulgaria has seen the entry into its market of a number of foreign energy companies.

How is electricity used in Bulgaria?

Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water.
