

Fix the solar front bracket

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel, PVMars will definitely recommend it to you, and effective solutions are based on solar panels' characteristics and your on-site installation environment.

How do you mount a solar panel bracket?

For brackets rated between 20W and 80W, align the short edge of the solar panel to the top edge of the bracket (Figure 3). For solar panels rated between 100W and 150W, align the long edge of the solar panel to the top edge of the bracket (Figure 3).

Can we choose a foldable/flexible solar panel?

Yes, we can choose a foldable/flexible solar panel. This kind of solar panel can design the original frame as hollow. This is so that we can use rope or other linear objects to pass through the hollow and tie it to the pole. There is a video below for reference. The purpose of installing the bracket is to better fix the solar panel.

How to install solar panels on a tile roof?

The rails carrying the solar panels will also be attached to the tile roof hooks. You might say that your own roof has no wooden strips. Generally speaking, there must be a relatively sturdy material on the top beam of the roof. This material acts as a skeleton to support the roof tiles.
