

The 15th edition of the Microgrid Global Innovation Forum, 13-15 September 2022 in London, focuses on microgrid advances, case studies and applications in Europe, Africa, Asia-Pacific, and Latin America.

Fudan Micro's RFID chips, smart-card chips and other products are used in devices made by domestic and foreign manufacturers, including Samsung, LG, VIVO, Haier, Hisense, and Lenovo, the sale ...

The audience for the Forum includes microgrid project developers, owners, and entrepreneurs; C& I end users; mining and energy development companies; utilities and renewable energy providers; energy ...

As data centers, EV uptake, electrification of industrial processes and other factors drive growth in demand for electricity in North America, microgrids and off-grid energy systems are seen ...

The event will explore practical applications of microgrids, their role in enhancing energy security and resilience, and the ways in which they can support the transition to a low-carbon future.

The goal is to foster information exchange and high-quality, one-to-one networking among industry professionals. Topics include grid modernization, microgrids, cyber security, EV charging ...

To deal with this problem, this research first reviews the real-world and simulation cases of zero-carbon microgrids in recent years and classifies them into two categories, i.e., on-grid mode ...

This workshop features five experts sharing microgrid use cases from various applications. Each presenter will focus on a specific microgrid project and cover the planning process used, any ...

The microgrid architecture is categorized into three categories based on future smart grid vision, i.e., AC, DC, and hybrid microgrids. Elements that used in microgrid, control of generation, forecasting ...

This course provides a comprehensive introduction to the fundamentals and specifics of microgrids. Participants will explore benefits, applications, configurations, challenges, policies, and funding ...
