

Greece Gigawatt Solar Power Project

Two leading energy groups RWE and PPC continue to forge ahead with Greece's energy transition through their joint venture company Meton Energy S.A. The company has taken the final ...

The Seli Project entails the construction of a 309 MW photovoltaic unit with an integrated lithium-ion battery energy storage system. This project aims to optimize electricity generation and ...

Meton Energy, a joint venture between renewable energy companies RWE and PPC, has made the final investment decision (FID) for the construction of a new solar project in Greece. The ...

Greece has made substantial strides in its solar energy infrastructure. By the end of 2023, operational solar photovoltaic (PV) capacity reached 8.1 GW, making it the eighth-largest solar ...

Construction work on our first eight solar farms is well underway. With our latest investment decision, we have prepared the ground for an additional 450-megawatt photovoltaic plant ...

Stelios Psomas, policy officer for the Hellenic Association of Photovoltaic Companies (Helapco), told pv magazine that projects selling power directly to the spot markets last year earned ...

The Korkia-funded partnerships will develop several solar power parks on the mainland of Greece and the island of Crete, targeting renewable energy production capacity of over one gigawatt.

By accelerating the development of our solar projects with a combined capacity of nearly one gigawatt, we are actively contributing to the country's renewable energy goals.

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs ...

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek "Operator of Electricity Market" RES fund. To reduce that deficit...

The Delfini Solar Project is the first renewable project in Greece to benefit from the Next Generation EU Recovery and Resilience Facility. The Delfini Solar Project can generate 157 gigawatt ...
