

How much does a 10kW user-controlled cabinet cost at a substation in Vietnam

How much does a 2025 compact substation cost?

Navigating the 2025 compact substation price list doesn't have to be overwhelming. With prices starting at \$6,800 for a 250kVA unit and reaching \$42,000 for a 2500kVA dry-type model, there's a solution for every budget. By understanding factors like capacity, voltage, and features, you can make a smart choice for your project.

How much does a substation cost?

A substation is a critical part of the electrical grid, and the cost to build one can be significant. For example, a 1000 kVA substation can cost anywhere from \$500,000 to over \$1 million. The cost will vary depending on the size and location of the substation, as well as the type of equipment used.

How much does a 33kV substation cost?

For a small substation, the cost may be as low as \$20,000.00. For a larger, more complex substation, the cost could be upwards of \$1 million. The price range for a 33kV substation will also depend on the location of the project and whether or not it is considered to be in a high-risk area.

How much does a 500 kV substation cost?

The exact cost will depend on a number of factors, including the location of the substation, the size and scope of the project, and any unique features or challenges that may be involved. But in general, you can expect to spend anywhere from \$15 million to \$50 million for a typical 500 kV substation.
