The PV cell is the basic building block of a PV system. Individual cells can vary from 0.5 inches to about 4.0 inches across. However, one PV cell can only produce 1 or 2 Watts, which is only enough electricity for small uses, such as powering calculators or wristwatches. PV cells are electrically connected in a packaged, weather-tight PV panel (so... See more on [eia.gov](http://eia.gov) Published: Oct 1, 2024.
