

Is it legal to shut down the power to a communication base station

Anyone found operating a radio station without FCC authorization can be subject to a variety of enforcement actions, including seizure of equipment, fines and other civil and criminal penalties.

Although the FCC permits an effective radiated power (ERP) of up to 500 watts per channel (depending on the tower height), the majority of cellular or PCS cell sites in urban and ...

Most AM radio stations are required by the FCC's rules to reduce their power or cease operating at night in order to avoid interference to other AM stations. FCC rules governing the daytime and nighttime ...

Section 704 of the Telecommunications Act of 1996 (the "1996 Act") governs federal, state and local government oversight of siting of "personal wireless service" facilities.

Building new towers or collocating antennas on existing structures requires compliance with the Commission's rules for environmental review.

In the small town in Langley, in Washington state, residents had foresight, educated themselves and passed a strong but legal wireless facilities ordinance to give as much power as ...

(a) No person shall use or operate apparatus for the transmission of energy or communications or signals by space or earth stations except under, and in accordance with, an appropriate authorization ...

Further, your state may have adopted a 5G "small cell" streamline bill which could preclude local officials' ability to implement installation setback requirements. This briefing is not legal advice but ...

Whether it's legal (or not) or constitutional (or not), there's several very good reasons that a government shouldn't be in the business of shutting down communications, particularly in ...
