

What is an electrolytic capacitor? An electrolytic capacitor is a type of polarized capacitor that uses a wet electrolytic solution and an oxide film to store electrical charge.

ITELCOND is a manufacturer of aluminium electrolytic capacitors for electronic equipment, alternative energy (solar/wind), UPS, Inverter, Motor Control, Electromedical Equipment.

Headquartered in Milan, Italy, Italfarad specializes in the production of a wide range of capacitors, including aluminum electrolytic, film, and ceramic capacitors.

Our expertise can help our Customers on 105°C products with very good lifetime characteristics, while the majority of products rated 85°C have the excellence of non-flammability, which is an important ...

100% Italian production of low, medium and high voltage capacitors, power factor correction banks, inductors and reactive energy compensation solutions.

Our company has been producing high-capacity aluminum electrolytic capacitors for over 30 years for applications that require a high level of quality; therefore, we cater to various companies that...

This article explores the innovative landscape of supercapacitor technology, highlights key applications, and identifies why Milan-based manufacturers like EK SOLAR are at the forefront of this dynamic ...

Gruppo Energia Electrolytic capacitors are featured by a high capacitance-voltage ratio. They can be used for alternative energy, industrial, telecommunications, automotive applications, etc.

Kendeil is an Italian manufacturer with over 40 years of experience in producing high-quality large can aluminum electrolytic capacitors and power film capacitors.

Italian Milan Super Electrolytic Capacitor
