

Kosovo replaces 6 25MWh of solar energy

This article explores Kosovo's energy independence journey, delving into the country's current energy landscape, challenges, and diverse opportunities. We examine strategic initiatives ...

One of the biggest projects in the energy field in Kosovo is the "Solar 4Kosovo", which will be used only for heating. This project will install one of the largest solar plants in Europe and the first ...

Guaranteed Connection Agreement with the Transmission Operator and reliable wind measurements provided by the Government of Kosovo; Studies regarding the topographical, logistical survey, ...

Kosovo's solar energy sector is poised for substantial growth, with the country's energy minister, Artane Rizvanolli, announcing plans to add 100 MW of new solar capacity by the end of 2025.

As a result, the share of solar power in the energy mix of Kosovo will increase from 0.2% to 2.3%. The plant is expected to produce around 152 GWh of electricity and save 152,000 tonnes of CO2 annually.

Government-controlled Kosovo Energy Corp. (KEK) said it is preparing to start building its Solar4Kosovo 1 photovoltaic plant near Prishtina. It informed the local community that agricultural ...

Known as Solar4Kosovo, this new solar plant is a key component of the EU's strategy to help Kosovo expand its renewable energy capacity and reduce its reliance on coal power.

The project is an important milestone for the transition of the energy supply in the Western Balkan countries towards a sustainable electricity supply. This is the first large-scale photovoltaic system in ...

By increasing the share and capacity of solar energy in power generation, the project will contribute to energy supply security, a faster green transition and economic growth in the region.
