

Kyiv Energy Storage Power Station Construction Project

Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

Ukraine's capital is accelerating its renewable energy transition, and the Kyiv Load Storage Project tender announcement marks a pivotal moment. This article breaks down bidding essentials, technical ...

DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ranging ...

The DTEK Group has connected six new energy storage facilities to the Ukrainian power grid, each with a capacity of 20 to 50 MW. The energy storage facilities were installed in the Kyiv and ...

The new plant, with an expected capacity of up to 600 MW of electricity and 300 MW of heat, is intended to enhance the city's energy stability, reliability, and autonomy. It will help reduce ...

DTEK partners with Fluence to deliver a 200 MW, EUR140 million energy storage project across six sites in Ukraine, strengthening energy security and supporting grid stability.

The company sees battery energy storage facilities as a path to decentralization and unification with the EU. In March, DTEK announced it was building Poland's first large electricity storage facility as part ...

As Ukraine's capital accelerates its renewable energy adoption, Kyiv energy storage system power generation facilities have become critical for managing solar and wind power fluctuations.

Russia resumed its assault on Ukraine's energy infrastructure overnight on 3 February, launching 71 missiles and 450 drones at Kyiv, Kharkiv, Dnipro, and other cities.
