

Latest Swiss New Energy Storage Requirements

To ensure that the grid meets future requirements, Swissgrid has updated its long-term grid planning in the Strategic Grid 2040 project and identified 31 key grid projects.

The Federal Act on a Secure Electricity Supply from Renewable Energy Sources was approved by Parliament in autumn 2023. The bill lays the foundations for a rapid expansion of Switzerland's energy production from ...

These installations embody what B-VAULT FlexGrid was designed to do: deliver compact, compliant, and intelligent energy storage where it's needed most, without compromise on performance or ...

As we approach Q2 2025's bid deadline, one thing's clear: Switzerland isn't just buying storage systems--they're procuring grid resilience. The winners won't be those with the cheapest kWh price, but ...

A new pumped-storage power station, one of the most powerful in Europe, came on stream in canton Valais in southern Switzerland in July 2022.

Energy Vault says it fully installed, commissioned, and Swissgrid-qualified the system in less than four weeks, and was delivered at the beginning of October.

Trade body Swissolar has called for a national energy storage strategy to support the rising popularity of home solar-plus-battery systems in the country. In Switzerland, roughly every second ...

We have already taken the first concrete step and defined the technical minimum requirements for connecting large storage systems. Our aim is to promote innovation and work with partners to lay the ...

Switzerland is expanding rules for rooftop solar, energy storage, and energy communities to expand self-consumption and ease pressure on the grid. The new regulations, set to take effect in 2026, ...
