

Latest energy storage microgrid projects

In 2024, the Army announced completion of new microgrids at Fort Hunter Liggett in central California, Camp Arifjan in Kuwait, Fort Cavazos in Texas and battery storage power to support Summer Cadet ...

Discover the latest trends in microgrid technology transforming resilient energy management, from AI-driven operations to renewable integration and rapid deployment strategies.

GridFlow's lithium-ion flow battery is a next-generation energy storage system that separates sulfur into a liquid reservoir capable of providing electricity for 20 or more hours for safer, ...

November 3 - Microgrids are being developed across the U.S. as new data centers drive up power demand and companies and communities seek reliable power supplies and protection against ...

A Switzerland-based energy storage group with U.S. headquarters in California has joined with Pacific Gas & Electric (PG& E) to deploy a hybrid microgrid energy project in Calistoga,...

The Office of Electricity announces 14 projects selected through the Community Microgrid Assistance Partnership (C-MAP) to advance microgrid innovations to bring energy reliability and ...

Energy Vault, a provider of grid-scale energy storage solutions, and Pacific Gas and Electric Company (PG& E), announced the completion and commercial operation of the Calistoga ...

Read about the transformative trends underscoring how microgrids are driving the New Energy Landscape in 2025.

The work began in 2008 as a project to install a high-efficiency, 100% renewable energy-powered, single-building microgrid. Since then, the project has expanded into an installation-wide ...

Portland's Fire Station 1 implemented an innovative solar-plus-storage microgrid in the City's push for energy resilience as Oregon prepares not only for a looming, unpredictable mega-earthquake, but ...
