

Mobile base station communication disconnected

A method and apparatus support a Mobile Station (MS) located in a collapsed cell area to be disconnected from a Base Station (BS) in a wireless communication system.

Troubleshooting a DMR (Digital Mobile Radio) base station can be a complex but manageable task. As a DMR base station supplier, I've encountered various issues over the years and have developed a ...

Customer: My telephone #1 isn't connecting with the base station, even when it's just 2 feet away. In contrast, my telephone #2 is able to connect with the base station, even though it's on a different floor.

This paper has presented a mobile relay scheme for achieving energy-efficient, fast, and reliable data delivery in the sensor network with disconnected base stations.

To rapidly restore damaged communication systems, we propose a UAV-based mobile base station equipped with Public Safety LTE (PS-LTE) technology to provide standalone communication ...

The pain points of mobile communication base stations span the entire lifecycle of construction, maintenance, operations, and security. The core conflicts lie between cost and efficiency, stability ...

Reboot the base station fully (unplug from AC power AND disconnect the back up battery found on the bottom of the unit) and/or reboot your WiFi router would be the first thing I'd try.

This research aims to design an innovative communication system to bridge this gap, ensuring efficient information transfer and establishing reliable communication channels between ...

An emergency communication system is necessary for first responders, who need to enter areas with no network coverage or damaged network infrastructure due to n
