

New energy battery storage factory put into production

Why is Tesla launching a battery factory in China?

The battery factory marks the company's first energy storage system factory outside the US to manufacture its energy storage batteries known as Megapacks, and is also another major investment for Tesla in China following the inauguration of its Shanghai Gigafactory in 2019.

Where is Tesla's first energy storage plant located?

Tesla's first overseas energy storage plant starts operating as global competition from Chinese firms and pricing pressures mount. Tesla has officially announced the start of production at its Shanghai energy storage factory, the company's first Megapack manufacturing facility outside the United States.

Will Tesla's Shanghai energy storage megafactory expand?

At the launching ceremony, Mike Snyder, Tesla's vice president of energy and charging, noted that Tesla's Shanghai energy storage Megafactory is scheduled to ramp up production this quarter, which will assist Tesla to expand into more markets. "We've witnessed the incredible speed of Shanghai and Tesla once again.

How many Megapack batteries will Tesla produce a year?

The plant has a planned output of 10,000 units of commercial Megapack energy storage batteries annually and a designed storage capacity of nearly 40 gigawatt-hours. The battery products will be supplied to the global market, according to a Shanghai Observer report. Energy storage has become an important profit growth driver for Tesla.

A production launch ceremony of U.S. carmaker Tesla's Megafactory is held in Shanghai's Lin-gang Special Area, Feb. 11, 2025. (China News Service/Zhang Hengwei) U.S. ...
