

# New energy storage project in Copenhagen

A new battery storage project is nearing completion in Borup, Denmark, a region just north of Copenhagen.

Danish renewable energy developer Copenhagen Energy has hired local company Energrid to build a portfolio of battery energy storage projects with a combined capacity of 132 MWh.

A new pit thermal energy storage is now in operation in Høje Taastrup contributing to the heat supply of Copenhagen, Denmark. This 70.000 m<sup>3</sup> storage is the first of its type in operation in Denmark.

Danish renewable energy developer Copenhagen Energy has partnered with a local electricity and fibre network distributor Thy-Mors Energi to set up a 100MW PV and battery energy ...

The Swiss industrial technology company ABB has delivered the battery energy storage system for the project. This will supply power to approximately 200 apartments in Copenhagen during periods of ...

Copenhagen, Denmark -- European Energy has commenced the development of its first battery energy storage system (BESS) project at the Kragerup Estate in Denmark. The project, ...

Copenhagen, Denmark, 2nd of February, 2026 - European Energy has inaugurated Northern Europe's largest combined solar and battery park in Kvosted, Denmark. The hybrid asset ...

Copenhagen Energy's 132 MWh Everspring battery energy storage system (BESS) portfolio will source its technology from Huawei Digital Power. This project is scheduled for grid ...

This article explores cutting-edge energy storage solutions, their applications across industries, and why Danish projects set global benchmarks. Learn how advanced storage systems enable grid stability ...

When a 2022 cold snap froze wind turbines, the city's thermal storage facilities saved the day by releasing heat from summer-stored excess energy. Talk about a seasonal plot twist!
