

No subsidies for wind and photovoltaic power generation

This new legislation opens doors for all forms of power generation--including fossil fuel-based ones--to compete more fairly against emerging technologies like wind or solar without ...

As we consider the critical reforms in the reconciliation process, I rise today to make the case for why we must eliminate the generous federal subsidies for wind and solar energy, paid for by ...

Subsidies are meant to drive prices down and boost supply. But subsidizing wind and solar has done exactly the opposite.

Renewables received 46 percent of overall power subsidies, despite constituting a very small portion of overall power generation. This isn't subsidies per kilowatt hour of generation.

While the standards are not subsidies in the traditional sense, multiple experts said they function like subsidies and have driven wind development in areas where it otherwise would not...

Congressional Republicans passed the One Big, Beautiful Bill, which put the brakes on federal clean energy subsidies by terminating investment and production tax credits for wind and solar...

Congress is currently debating the fate of costly renewable subsidies within the Inflation Reduction Act, which would increase wind and solar power, causing utility rates to increase, and ...

Let's eliminate any and all subsidies for wind and solar -- and coal, oil, and methane as well. Project 2025 is nothing if not a giant subsidy for the fossil fuel industry.

ENDING AMERICAN DEPENDENCE ON UNRELIABLE ENERGY SOURCES: Today, President Donald J. Trump signed an Executive Order to eliminate subsidies for unreliable "green" ...

The two renewable sources have been cheap relative to natural gas-fired power without subsidies for at least a decade. Utility-scale solar today is 84% cheaper than it was 16 years ago; ...

No subsidies for wind and photovoltaic power generation
