

Pakistan's 800MW solar power project

Solar power became part of the energy mix in 2013, following government policies aimed at supporting renewable energy development. The country now has seven large-scale solar projects that ...

The National Grid Company of Pakistan Limited (NGC) has notified the Private Power and Infrastructure Board (PPIB) about the inclusion of two projects with capacities of 1,000 MW and 1,800 ...

These projects, located in Layyah, Jhang, and Muzaffargarh, are likely to be offered to Saudi Arabia's ACWA Power under a potential Government-to-Government (G2G) agreement, ...

The National Grid Company of Pakistan Limited (NGC) recently informed the Private Power and Infrastructure Board (PPIB) that land has been earmarked for solar projects in Layyah, ...

One of the most profound yet under-acknowledged dimensions of Pakistan's solar boom is how it's facilitated energy access after 60 years of trying to do this with subsidized fossil fuels.

The Pakistani government has added two large-scale solar power projects, totalling 2,800 megawatts, to its 2025-2035 Indicative Generation Capacity Expansion Plan (IGCEP), Daily Times ...

OverviewHistoryGovernment policyProjectsFarmingChallengesPublic receptionAs of 2025, solar power is the largest electricity source in Pakistan, accounting for more than 25% of total production in 2025. In 2024, solar power installations in the country grew at the highest rate in the world, with solar installations providing an estimated one-third of the country's entire generating capacity added during the year. As electricity prices doubled from 2021 to 2024, and Chinese solar panel manufacturers with manufacturing overcapacity cut prices, Pakistanis have taken to installing solar pa...

London-listed Oracle announced this week that it had begun a grid interconnection study for the proposed project in Jhimpir, Sindh Province, Pakistan. The proposed site will include an ...

This surge in solar and batteries is driving down energy costs and improving reliability for individual users in Pakistan. By reducing dependence on imported fuels like LNG, it is easing ...
