

Imagine flying over northern China and spotting a giant panda... but instead of fur, it's made entirely of solar panels. Sounds unreal, right? But it's 100% real -- and it's one of the cutest ...

So in a bid to make solar power more appealing to young people, one Chinese company has ditched the traditional approach of filling fields with uninspiring rows of PV panels, instead ...

This is a solar power station in Datong, Shanxi, and the world's first panda-shaped photovoltaic power station. It has been connected to the grid and has a total area of 248 acres.

However, the country is also building solar farms in the shape of its national treasure, the panda. The first one opened in 2017 in Datong, Shanxi Province and is made up of thousands of black and white ...

**The Origin Story** The idea actually came from a 15-year-old student, Ada Li Yan-tung, in 2015. She wanted to make solar energy feel more accessible and "fun" for her generation. The Panda Green...

"Designing the plant in the shape of a panda could inspire young people and get them interest in the applications of solar power," said Panda Green Energy's CEO, Li Yuan, last year.

Representing a unique opportunity to take action against climate change, as well as contributing to the achievement of the SDGs, the Panda Solar Stations is the first integration of the world's two most ...

Spotting giant pandas in the PRC just got easier, with the development of a huge 100MW solar park in the shape of the national animal. Panda Green Energy, the firm behind the project, has ...

The Datong Panda Power Station in Tujing Village, Duzhuang Township, Yunzhou District, Datong City, Shanxi Province, is a solar power station in the shape of a panda.

The construction of the first solar power station in Datong region is mainly due to the considerable sunshine intensity and radiation index, large land area and strong plasticity, which meet ...
