

Photovoltaic bracket ring groove rivet

Grooved Rivets are designed to be installed within a hole made of fibrous materials such as wood and some low-medium density plastics. When set properly, the annular rings around the body will bite into the wood or ...

The Structural rivet is used to reinforce the support of the solar module, since due to its good hole filling, it allows compensating uneven holes, and supporting high loads.

Choose from our selection of grooved rivets, including blind rivets for wood, locking-collar rivets, and more. Same and Next Day Delivery.

Rivmate's rivets are engineered to meet the mechanical and environmental challenges of modern solar panel installations. Selection of high anti-corrosion materials (stainless steel 304, aluminum, galvanized steel), to ...

It aims to help you understand how to choose the appropriate blind rivets for solar industry for different photovoltaic scenarios and provide professional suggestions and application solutions from Rivmate.

Popular consumables include blind rivets such as the Gtrriv, with its neoprene gasket ideal for trapezoidal sheet metal and sandwich panels, and the Lockriv for wide hole diameter tolerance.
