

Portugal Energy Storage Project

Portugal is firmly committed to achieving carbon neutrality by 2050. A cornerstone of this strategy is the integration of Battery Energy Storage Systems (BESS) to support its rapidly ...

Portugal is looking to support at least 500MW of energy storage capacity via grant support using EU-wide funding.

Under this PRR scheme, 41 projects were approved, totalling around 500 MW of new storage capacity and EUR 99.75 million in grants. The main beneficiaries include Akuo (80 MW), Iberdrola (80 MW), ...

Hyperion's first battery storage projects in Portugal, located in Estremoz and Évora. Co-located with solar PV plants, enabling energy to be stored during peak production hours.

Portugal's Greenvolt will spend EUR60M on Europe's largest battery storage hub, boosting EU grid stability, adding skilled jobs at home and lowering energy bills.

The Portuguese Ministry of Energy has allocated EUR99.75 million for grid flexibility and energy storage projects which should be installed by the end of 2025. 41 applications approved for funding.

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...

Biogas microplants, batteries, pumped hydro, and emerging technologies like green hydrogen form a stability ecosystem that will allow Portugal not only to maintain its leadership in ...

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package aimed at improving grid reliability and ...

Battery storage is now essential to ensure flexibility and resilience to electrical systems, supporting the growing incorporation of renewable energies. More than a technical statement, it is a ...
