

The country added 120 gigawatts of utility-scale solar projects, exceeding the 96.3 gigawatts of new distributed capacity, which are mainly on the rooftops of homes and office buildings, ...

China installed an astonishing 36GW of rooftop PV in first quarter, and is expected to install even more this quarter, as a new study points to a fall in overall emissions.

Further research indicates that the surge in rooftop PV installations will continue into the second quarter of the year, pushing total distributed solar capacity additions for 2025 to 130 GW, ...

China installed a record 60 GW of new PV capacity in the first quarter of 2025, driven by a surge in rooftop deployment ahead of updated grid-access rules, says Rystad Energy.

China saw a record surge in solar photovoltaic capacity in the first quarter of 2025, driven largely by new guidelines promoting distributed solar projects and self-consumption.

China added a record 60 GW of new solar capacity in the first quarter of 2025, with rooftop installations accounting for 36 GW - the highest quarterly total for distributed PV in the ...

Via South China Morning Post, a look at China's massive "distributed" solar power generation program on roofs of houses, factories and airports is spreading across country, but ...

Rooftop solar has become a significant player in China's transition to clean energy. In March, China's energy authorities highlighted the triple benefits of their initiatives: accelerating power ...

Here we assess the deployable potential of RPV across 367 Chinese cities by incorporating variations in building types, regional characteristics and policy limitations. Our findings ...

By the end of this guide, you will have a comprehensive understanding of the rooftop solar landscape in China, including practical tips for installation, maintenance, and maximizing ...
