

Solar Photovoltaic Power Generation Project Policy

At the federal level, there are several key policies, programs, and regulations that impact the development of solar PV and other renewable energy projects, influencing project procurement ...

This page describes the patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact project development.

The Toolbox for Renewable Energy Project Development's Solar Interconnection Standards and Policies page provides an overview of the interconnection policy and standards, as ...

With an ambitious target of generating 40% of the nation's electricity from solar sources by 2035, the law establishes unprecedented tax credits for solar installations, streamlines permitting ...

Such a primer may include an overview of different technologies (e.g., PV versus CSP), proven technologies versus emerging technologies, solar terminology, local solar resource data and ...

"Renewable energy project" means any solar-powered electric power generation project built for individual, farm, corporate, or non-profit use and not connected to the power grid for electrical ...

The U.S. Department of Energy Solar Energy Technologies Office (SETO) supports PV research and development projects that drive down the costs of solar-generated electricity by improving efficiency ...

This statute provides the framework for the development of solar energy and wind energy projects on federal lands managed by the Bureau of Land Management (BLM).

The policy goals of photovoltaic power generation are divided into three aspects: improving technology and promoting production, promoting construction and application, and ...
