

Solar and wind power generation projects

The Gujarat Hybrid Renewable Energy Park is set to be a global landmark in renewable energy infrastructure, targeting 30 GW of combined solar and wind power generation. Located in the ...

The BLM continually receives proposals for utility-scale wind, solar, and gen-tie line projects on public land, which are in various stages of review or implementation.

A lot of progress has been made - a boom in solar and wind energy projects pushed the world past 40% clean energy used in 2024 according to think-tank Ember. Carbon dioxide emissions, ...

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatthours (kWh) in 2023 to 286 billion kWh in ...

But the wind farm soon became a casualty of President Trump's efforts to slow -- and sometimes revoke -- federal approvals for wind and solar projects.

Here, we demonstrate the potential of a globally interconnected solar-wind system to meet future electricity demands.

Take a virtual tour of some remarkable renewable energy projects from around the globe, each showcasing innovative technology, ambitious scale, and a commitment to a cleaner, more ...

Prospective utility-scale solar and wind capacity -- projects that have been announced or are in the pre-construction and construction phases -- grew by over 20% globally in 2024 from 3.6 ...

The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy technologies, focusing on their current challenges, opportunities, and policy ...

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...
