Like other home storage systems, the sonnenBatterie from sonnen is

Sonnen battery manufacturers

also designed to increase the rate of own consumption of self-produced energy. Usually, a level of self-consumption of 30 to 55 percent can be reached with a photovoltaic system, when using smart-home functions. With a storage system, this rate is around 60 to 80 percent, as the self-produced electricity can be stored until it is consumed within the household. There is less need to source external electricity, especially mornings or evenings.

Our endeavours are based on the vision of two pioneers, Christoph Ostermann and Torsten Stiefenhofer. They challenged the status quo and wanted to create a world where energy is clean ...

In Germany, Sonnen was one of the first suppliers of lithium-ion batteries for stationary use in homes [22] and is considered market leader [23] in Germany and globally.
