

The solar power generation scam in western Guangdong was revealed

The report revealed that undocumented components were found in several solar inverters and batteries made in China. These reviews are part of ongoing efforts by U.S. agencies to identify and mitigate ...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has prompted US...

The reported discovery of "rogue communication devices" in Chinese-exported solar inverters spurred new scrutiny of Chinese imports and of the security of the domestic electric grid.

The rogue devices, including cellular radios, were discovered in Chinese-made power inverters that are used to connect solar panels and wind turbines to electricity grids across the world, including the UK.

Engineers have discovered "kill switches" embedded in Chinese-manufactured parts on American solar farms, raising fears Beijing could manipulate supplies or "physically destroy" grids across the...

Experts uncover rogue devices in Chinese-made inverters and batteries, prompting U.S. and EU nations to review renewable tech security.

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with the...

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment hooked up to grids to check...

Unexplained communication devices have been found inside some Chinese-made inverter devices, according to a Reuters report. The news agency claims US energy officials are reassessing the risk ...

US experts have found unauthorised devices in Chinese solar equipment, raising fears of potential remote grid disruptions and security threats.
