

Tunisia accelerates clean energy transition by awarding large-scale wind and solar projects to global developers under its 1.7GW plan.

In 2010, Tunisia launched the Prosol Elec program to promote the installation of solar panels on roofs connected to the low-voltage grid through subsidies and loans.

Tunisia has awarded French renewable energy company Voltalia a contract to develop a 132-megawatt solar power project to boost electricity supply in the country.

This literature review describes the basic concepts of solar energy and the production of electricity using the photovoltaic effect in the case of Tunisia. The main elements of the photovoltaic system are ...

On December 10, 2024, Tunisia took a major step in its energy transition by signing 10 contracts for small-to-medium-scale solar projects (1-2 MW each) under a licensing system.

For North Africa's energy transition, the project marks a decisive step toward cleaner, more secure power systems. Tunisia has commissioned a 120-megawatt solar power plant in ...

Voltalia selected to build 132-MW Wadi solar plant in southeastern Tunisia Project lifts Voltalia's Tunisia solar pipeline to nearly 400 megawatts Solar push supports Tunisia's strategy to ...

Anglo-Tunisian group SoleCrypt announced plans for a 60 MW PV plant in Tozeur, part of a broader initiative to connect eventually to the Medusa submarine cable, enhancing Tunisia's ...

Average global horizontal irradiation is between 4.2 kWh per m<sup>2</sup>; per day in the north-west of Tunisia and 5.8 kWh per m<sup>2</sup>; pd in the extreme south. Given these favourable conditions, the productivity of solar ...
